

Sound Seal Introduces MetalTrends™ Acoustical Metal for Walls and Ceilings

Metal Faced Acoustical Wall Panels, Ceiling Clouds and Tiles

AGAWAM, Mass. – December 15, 2015 – [Sound Seal](#), a leading manufacturer of acoustical and noise control products serving the industrial, architectural, commercial and construction industries, announced today the availability of its latest product line, [MetalTrends™](#). This product line is comprised of [Tranquility Wall Panels](#), [Lucidity Ceiling Clouds](#) and [Serenity Ceiling tiles](#).

MetalTrends™ is a family of high performing metal wall and ceiling sound absorption panels. These products are ideally suited for new construction or renovation of any space with reverberant noise problems or where the need to acoustically tune a space is desired. Light weight perforated metal construction combines durability, economy and aesthetics with excellent sound absorbing characteristics in our easy to install modular designs.

“We are very excited to add metal panels and tiles to our architectural product offering,” said Dave Gilbert, General Manager at Sound Seal. The new manufacturing capabilities that came with the acquisition of Industrial Noise Control (INC.) have opened up many opportunities to expand into rigid metal products company wide. With an already broad product portfolio, offering acoustical metal will better position Sound Seal to be a one stop solution for all acoustical needs.”

MetalTrends™ products are very low maintenance, easily cleaned, non-combustible and suitable for interior and exterior installations. This product family offers solutions for speech clarity, speech privacy and overall sound quality concerns in any environment.
